Introduction

Gulf Trading has been developing and producing sports surface for more than 20 years. Gulf Trading's Sport Flooring systems combine a high technology content with the best playing comfort. People are always at the core of every project at Gulf Trading. Players, customers and partners are the key figures of each phase, from planning to project development. Perfection can be achieved only with new targets, from new materials to growth and development. To project means to progress and for this reason each single project is the core of our work. Passion, enthusiasm and rigor allow us to reach the highest results. The product is the result of the efforts we make at Gulf Trading. It represents all our decisions and actions. All of these efforts result in high quality standards. Gulf Trading's Sport Flooring systems offer the best solutions for sport surfaces, guaranteeing excellent playing standard, safety for players and long lasting surface. Gulf Trading produces high performance acrylic coating systems for all types of recreational use, suitable indoor and outdoor.

Our sport floorings are uniform and with excellent technical performances:

Better Control

Perfect Ball Bounce

**Excellent Balance
Between Friction and
Sliding**

**Shock Absorbing
Qualities**

Jogging Track

Our Jogging Track comfort floor covering feels great underneath for the joggers and is joint-friendly for the people on foot. Its Free from heavy metal, and harmful substance. And most importantly it has a nice performance level for aging; electrical insulation, corrosion and impact-resistant

Features of our Jogging Track

1. Non-slip.
2. Outstanding grip.
3. Shock Absorbent
4. Better body control
5. Long lasting
(Extremely Durable; over 10 years)
6. Weather resistant
(All weather use; indoor & outdoor use)
7. Convenient to install and easy to maintain
8. Environmental-friendly, non-toxic,
non-pollution and recyclable

Athletic Track

Our Jogging Track comfort floor covering feels great underneath for the joggers and is joint-friendly for the people on foot. Its Free from heavy metal, and harmful substance. And most importantly it has a nice performance level for aging; electrical insulation, corrosion and impact-resistant.

Gulf Trading UAE can walk you through the full project planning process and will ensure you address each key criteria throughout to achieve the best outcome. Generally, a well-delivered project will consist of the following initial working stages: Identifying what is the project aim? what is the budget? what are the site constraints? Anticipated competition standard? What are the sporting requirements? What are the additional infrastructure requirements? Stakeholder consultation, specialist advice and from all this, you can develop a solid project plan that will be sure to deliver a successful outcome.

Gulf Trading top performing, elite full PUR, IAAF certified track system made from environmentally, renewable resources. We take great pride in Gulf Trading G-13's base layer being comprised of renewable resources. This is the track of the future and our innovation is leading the way to helping our planet and your athletes be successful.

This full PUR system has a proven spike resistant top layer, little to no impact on force reduction properties over a wide temperature range and has been formulated to resist UV and bio-degradation in the world's most demanding climates.

Spike Resistant

Force Reduction level

Environmental friendly and sustainable material

Artificial Turf

Artificial turf was installed at many inner-city playgrounds. Some schools and recreation centers took advantage of artificial turfs properties to convert building roofs into "grassy" play areas.

We offer high-performance artificial Turf that meets every requirement of the following sports: golf, tennis, football and paddle.

Football turf performs always at the same high standards in all weather conditions for game factors, such as ball roll, shock absorption and player comfort.

Multisport is recommended for heavily-used, smaller-sized sports arenas such as those at schools and community centers.

Golf: The turf feels, moves and looks just like real grass for a natural ball roll and realistic green speed. Our range of golfing artificial grass also includes products such as collars, fairways, rough, car paths, and many more.

Sport Acrylic Surface

Sport flooring systems based on acrylic resins are usually applied onto bituminous binder, to avoid a set of problems related to rising damp, which are typical of concrete substrates. Gulf Trading's answer to a successful application of sport flooring systems onto cement surfaces. It is an innovative epoxy resin used as a primer to promote adhesion of acrylic coating to concrete and to stop rising damp.

Available Colors

PRIMER FOR CONCRETE SURFACES

- APPLICABLE ONTO CONCRETE SURFACES
- IT STOPS RISING DAMP
- CONSOLIDATION OF THE SURFACE

Product	Thickness
1 Concrete Support	—
2 Waterstop	0,8 mm
3 Fun Base - 1 st Coat	1 mm
4 Fun Base - 2 nd Coat	1 mm
5 Fun Paint - 1 st Coat	0,4 mm
6 Fun Paint - 2 nd Coat	0,4 mm
7 Coverflex	0,2 mm
TOTAL THICKNESS	3,8 mm

EPDM Rubber Playgrounds

Rubber flooring is perfect for a variety of resilient uses, such as in gyms and health clubs. The material is resistant to weather and wear, and also provides cushioning which is ideal in settings where physical activity is taking place. Rubber flooring does provide very good long-term value.

Advantages of Rubber Flooring

1. Water resistant
2. Resistance to heavy impact loads
3. Rubber floors are hard to gouge, scuff or scratch, giving them tremendous longevity.
4. Resistant to cigarette burns and chemical spills
5. Naturally resilient against staining, mildew and mold, so they look great for years.

Padel Tennis Courts

Padel Tennis has taken the world by storm. A combination of both squash and tennis, padel tennis has been gaining a lot of popularity lately especially within the GCC region.

It is quite popular in certain places such as tennis clubs, sports & leisure centers, hotels, parks, golf clubs & residential communities.

As a mixture of both tennis and squash, padel tennis is only played in doubles.

The court is half of a tennis court and is surrounded by glass & meshed panels.

It is played with a tennis ball but with special racquet designed for this game.

The ROI on this game is quite attractive and we see the following benefits of this game:

1. New group of young members and adults for this game
2. Differentiation for your club
3. Better retention rate of existing members
4. Better usage of land space
5. It is not physically very demanding
6. High fun factor
